## About me

Abir Arafat Chawdhury, known as Abir 360, is a successful entrepreneur, skilled programmer, and expert web developer. He is the CEO and founder of Abir X Official Community. Born in Faridpur, Bangladesh, Abir has made a big impact in web development and entrepreneurship. For the past two years, he has worked as a freelance web developer on Upwork and Fiverr, delivering excellent results to clients around the world. Additionally, he has written several self-published books on web development, programming, and freelancing.

## Experience

### Modder

Abir Arafat Chawdhury is a skilled modder with the ability to modify any Android app. Whether it's unlocking premium features, changing app functionality, or customizing user interfaces, Abir excels in tailoring Android applications to suit specific needs and preferences, ensuring enhanced performance and unique experiences.

### Coder

As a coder, Abir Arafat Chawdhury is a versatile programmer proficient in a range of languages, including Python, Java, PHP, and SQL. Abir is dedicated to creating innovative solutions, from developing complex web applications to crafting efficient scripts and backend systems. Whether building powerful automation tools, websites, or databases, Abir brings coding ideas to life with precision and creativity.

### Carder

Abir Arafat Chawdhury is an experienced carder, specializing in finding bank BINS, developing related apps, and engaging in buy/sell activities. With a deep understanding of digital security and carding processes, Abir navigates the world of financial transactions with skill, providing essential services and solutions within the field.
